India Leaders Try to Avert **Power Battle**

By CONRAD FINK

NEW DELHI, India (AP) -The high command of India's ruling Congress party met today to disc use the selection of a sucessor to the late Prime Minister Nehru.

The leaders are striving to avert a power struggle that could rock the party and endanger the nation's stability.

The immediate task before the

high command, known as the working committee, was to set a date for electing a parliamentary leader who automatically become head of govern-`ment.

The committee also deliberated whether to agree on a candidate and offer official advice to other Congress party members in parliament. The party's members of Parliament will elect the man who gets the top job.

A move to postpone the succession issue for two months has proved extremely unpopular in ongress circles. The postponement proposal was seen as a move to enhance the position of acting Prime Minister G. L. Nanda, who moved up from his ing to a member of the local Cabinet post of home minister police force he noticed and adto form a caretaker govern-ment after Nehru died Wednes-holster he was wearing. Rocky Would Use H-Bomb **If Necessary**

By ROY ROBERTS

SAN FRANCISCO (AP)-Gov. Nelson A. Rockefeller of New York says he's qualified to press the H-bomb button if necessary, but he wants to see atoms put to work for peaceful uses.

Sen. Barry Goldwater of Arizona, his opponent in the Tuesday race for California's 86 votes at the Republican National Convention in July, says that Rockefeller is a stand-in for President Johnson in the primary.

Rockefeller wound up a week of campaigning with a speech in San Francisco Friday and flew to New York. He will return Monday for an air tour of 14 California cities.

Goldwater planned to campaign in the Los Angeles area up to the last minute.

Rockefeller was asked at a Commonwealth Club luncheon appearance on Friday why he thought he was better qualified to press the H-bomb button than Goldwater. The governor pointed to his 25 years in public life and listed high posts he held under former President Eisenhower. He di dnot directly comment on Goldwater's qualifications. In answer to another question, Rockefeller said th cattempt to land on the moon distorts the American space effort. He said he'd rather see some \$2.5 billion

uses of th eatom. Rockefeller returned then to the main theme of his campaign, that his differences with Goldwater are the differences between responsible Republicanism and extremism in the Re-

When such profit percentages are high, business spends freely for new plants and equipment. When they shrink, so does the urge to expand.

Others point out another factor tending to act as a governor on business spending plans. This is the percentage of production to facilities. As sales have risen in recent months, excess capacity has been shrinking. As Aids Economy the plants now building of production the ratio of production to capacity seems likely to drop again.

Apollo Model Rocket Ship Standings Is Orbited

By HOWARD BENEDICT CAPE KENNEDY, Fla. (AP) —An unmanned model of the H Apollo moonship was rocketed [] into orbit by a Saturn 1 superbooster today in the first of a Clong series of launchings aimed at manned lunar landings.

Although the rocket and spacecraft are only early versions of the vehicles which will carry astronauts to the moon, the flight was an impressive start for the \$20-billion Apollo program.

Within two years, advanced models of both are scheduled to lift three-man Apollo teams into earth orbit to prepare for moon trips late in this decade.

The huge Saturn 1, scoring its sixth straight test flight success, rumbled skyward at 12:08 p.m. under the tremendous force of 1.5 million pounds of thrust generated by the world's greatest known rocket power

The rocket's cluster of eight first-stage engines, spewing a tail of fire more than 300 feet long, burned out after 146 seconds and the second stage, driven by high-energy liquid hydrogen, ignited with a 90,000pound thrust kick.

The upper stage burned for eight minutes and drilled the "boiler flight" Apollo model into orbit more than 100 miles above the earth at 17.400 m.p.h. The second stage was steered for the first time by a new guidance system which will be the same used to place Apollo astronauts on the path to the moon . Exact orbital figures were not

known immediately. The spacecraft, with the second stage and an instrument unit still attached, was to orbit on a course ranging from 110 to

140 miles high.
The National Aeronautics and Space Administration announced that preliminary data indicated the satellite, weighing 37,300 pounds, would circle the earth 37 times, about 55 hours, The gun turned up Wednesday | before burning up from atmos-

8 Americans Killed in So. Viet Nam

WASHINGTON (AP) - Secre tary of the Army Stephen Ailes said today that eight Americans have been killed in South Viet Nam in accidents due to structural failures of the C 21 helicopter.

This is the "Flying Banana" type helicopter which has now been almost entirely replaced with UH1B Bell of the Iroquois

Ailes' statement was in an swer to a letter from Rep. Oliver P. Bolton R-Ohio who had written Rep. Carl Vinson, R-Ga. chairman of the House Armed Services Committee, demanding an investigation of the Viet Nam helicopter situation. Bolton released Ailes' reply to newsmen today.

Bolton wrote to Vinson that 'I became acutely aware of the problem involving helicopters when one of my constituents was recently reported killed in action on April 11th of this year. Pfc Albert Laurence Shimek, Unionville, Ohio, was killed when the helicopter in which he was riding lost its tail assembly on a South Vietnamese mission. Several other Americans were killed in the same crash of the UHIB 'Iroquois.' '

The Ailes' statement on eight Americans killed referred only to the older CH21 helicopters. The last of these are to be replaced by the end of June. Ailes said the structural fail-

ures of the CH21s "had no similarity and were not specifically due to age or length of service of the items involved." In connection with the Iroquois crash that killed his constituent Bolton asked what

engineering modifications are

planned as a result of what he called a structural failure. Ailes replied that the cause of that crash is still unknown but as a result of an investigation possible structural problems were revealed which may have contributed to the accident."

Hope Star publishes 17 cartoons and the crossword puzzle daily — 12 features on this page — and the other five on separate pages.

Our reproduction is the largest offered by the national newspaper feature syndicates. The remaining four - column strips will be increased to five columns as soon as the syndicates make the larger size available.
